Soft Skills

- Customer relations and product management
- Market research and competitive analysis
- Teamwork and collaboration
- Time management and prioritization
- Decision-making and risk management
- English (Full professional proficiency)

Profile

I started my career in sales and marketing. Leveraging my e-commerce experience, I switched to software development. My journey started with front-end development and then I branched out into back-end development and eventually became a full-stack developer.

By adopting the developing technologies in the Web3 world, I turned to this field and started creating projects for hackathons under the mentorship of Trio Labs. As my knowledge of Web3 continued to grow, I began to use it for investments and advisory services, portfolio management and partnerships.

I am currently expanding my expertise in the web3 field while also I work on the development of SaaS applications with my team Trilemma.

Education

Marmara University | Computer Programming 2024

Anadolu University | Information Management Systems 2025

Experience

Trilemma | Team Lead – Full Stack Developer 02/2024 – Now

- Design and management plans were prepared for projects, especially Teknofest.
